Your trusted partner in mobile security solutions!

At TelescopicMast, we understand the pressure to keep sites safe – especially when things are happening fast and the stakes are high. That's why we've made it our mission to deliver seriously reliable, rapidly deployable CCTV towers that simply get the job done.

Since launching in 2018, we've become a trusted name for over 200 customers in more than 30 countries, worldwide. From construction sites and event venues to remote infrastructure, solar parks, data centres and military zones, our towers are out there every day – helping security teams like yours stay in control, whatever the environment.

We design and build everything ourselves. Our engineers obsess over the details, making sure every mast and trailer is tough, easy to deploy and ready to work with your preferred surveillance equipment. Nothing off the shelf – just smart, practical design that stands up in the field.

Behind the scenes, we've got a team of logistics and customer service professionals to keep things running smoothly. Orders ship fast, support is always a phone call away, and we listen when you tell us what you need.

Our flagship product – the Mobile Security Box – is designed to be flexible, future-proof and tough enough for the real world. And yes, it's been put through its paces and certified by TÜV Rheinland, so you know it's safe and sound.

After all, we're not just here to sell you a product. We're here to be a partner you can count on, whether you're rolling out five units or fifty.

Thank you for being part of the journey.

The Mobile Security Box

The solid base for your rapid deployment CCTV security solution

In a world where security threats evolve by the hour, you need equipment that keeps pace. TelescopicMast offers proven, professional solutions designed for today's fast-paced security landscape. Our Mobile Security Box is a powerful, flexible surveillance tower designed to adapt to your operational needs - whether you're securing construction sites, public events, critical infrastructure or remote locations.

Adjustable in height from 4 to 9 metres, this tower provides exceptional surveillance coverage, giving your teams the edge in early threat detection and rapid response. It's fully compatible with equipment from all major CCTV manufacturers, making it easy to integrate with your existing systems and tailor each deployment to your customers' specific requirements.

For off-grid or temporary installations, the Mobile Security Box can be fitted with solar panels and internal fuel cells, making it ideal for stand-alone use without sacrificing reliability. Choose TelescopicMast as your partner in the field. Our Mobile Security Box gives you the mobility, adaptability and reliability that modern CCTV operations demand - with the confidence of a solution built by experts, for experts.

TELESCOPICMAST

Protect people, sites and assets

Mobile Security Boxes are ideal for securing remote locations, temporary setups, and enhancing on-site security presence. As demand grows for rapid deployment CCTV systems, these solutions offer a cost-effective alternative to traditional guarding methods. They enable quick detection of intrusions, helping to reduce damage, theft, and delays on active projects.

Typical applications include:

- Improving safety at major events, festivals, concerts & public gatherings
- Construction and industrial site security
- Roadside and traffic monitoring
- Protecting vacant properties
- Protecting infrastructure
- Reducing cable and metal theft
- Wind and solar farm security
- Crime hotspots such as car parks or isolated locations
- Preventing and minimising fire risk
- Monitoring railroad tracks

Build your own rapid deployment cctv solution

Build your own rapid deployment cctv solution

Designing your own mobile security mast allows you to create a tailored CCTV solution that perfectly fits your project needs. Instead of relying on fixed, one-size-fits-all systems, you get full flexibility in selecting the cameras, recording equipment, power sources, and accessories that work best for you.

This approach not only enhances system performance but can also reduce overall setup costs.

You can choose from a range of surveillance technologies, including fixed, PTZ, thermal, or ANPR cameras, and integrate them with your preferred VMS or NVR systems. The tower's design ensures easy access for installation, offers strong wind resistance, and serves as a visible deterrent—ideal for protecting assets and people. Power options include mains electricity, battery backups, solar panels, and fuel cells (hydrogen or methanol), offering reliable off-grid operation.

With forklift slots and lifting points, the mast is easy to transport and quick to deploy, even by one person.

Built from robust, galvanised steel and certified to CE and TÜV standards, these mobile towers are made to last. Whether for a construction site, event, or remote location, this solution gives you a scalable, future-proof setup with optimal return on investment.

Add your own devices...

Equipment

You can equip our Telescopicmast with a complete solution of your choice.

1. Choose your cameras:

Fixed, High speed PTZ dome, Thermal, ANPR.

2. Choose your recording device:

Standalone DVR, VMS, NVR.

3. Choose additional equipment:

Detection devices, Audio & Public Address, Lighting.

4. Choose your power source:

Mains power, Battery backup, Fuel cells, Solar power.

5. Brand your box:

Complete your box with custom graphics on each side, promoting your own or your customer's company.

Features of the Mobile Security Box

1

Built-in extendable mast with a 4 spoke mast top with standard mounts for CCTV cameras or flood-light.

2

Steel cables to the masthead which reduce camera vibration that causes false alarms.

3

Easy to brand with your personalised message on all sides, making this a highly visible way to promote your company.

4

Fast to install by only one engineer using the manual winch, reducing installation costs.

5

Vandal resistant lockable steel box construction with two lockable top covers protecting your electronic equipment inside.

6

Four extendable stabilisers and spirit level to ensure the mast is stable, even in strong winds. up to 85 km/hrs

7

Heavy duty 4 sided forklift slots and mounting points, making it easy for transportation and on-site deployment.

Easy to transport to site

TELESCOPICMAST

Mini, Single & Double Box trailers

Our specially designed trailers for the TelescopicMast Mobile Security Box are available in a mini, single and double axle version. Utilize our lift eyes, forklift, or specially designed trailer to transport and install the Mobile Security Box quickly and easily.

- Heavy support wheel
- Shock absorbers
- Wheel chocks
- Adjustable width forks
- Tie hooks and rails
- Hot dip galvanised chassis
