About TelescopicMast

At TelescopicMast, we understand the pressure to keep sites safe - especially when things are happening fast and the stakes are high. That's why we've made it our mission to deliver seriously reliable, rapidly deployable CCTV towers that simply get the job done.
Since launching in 2018, we've become a trusted name for over 200 customers in more than 30 countries, worldwide. From construction sites and event venues to remote infrastructure, solar parks, data centres and military zones, our towers are out there every day - helping security teams like yours stay in control, whatever the environment.

We design and build everything ourselves. Our engineers obsess over the details, making sure every mast and trailer is tough, easy to deploy and ready to work with your preferred surveillance equipment. Nothing off the shelf - just smart, practical design that stands up in the field.

Behind the scenes, we've got a team of logistics and customer service professionals to keep things running smoothly. Orders ship fast, support is always a phone call away, and we listen when you tell us what you need.

Our flagship product - the Mobile Security Box - is designed to be flexible, future-proof and tough enough for the real world. And yes, it's been put through its paces and certified by TÜV Rheinland, so you know it's safe and sound.
After all, we're not just here to sell you a product. We're here to be a partner you can count on, whether you're rolling out five units or fifty.

Thank you for being part of the journey.

TELESCOPICMAST

Three applications

Construction site security
TelescopicMast security towers can help offering 24/7 surveillance for construction sites, deterring theft and vandalism. With up to 9-metre height, they provide wide-area visibility. Built for tough environments, they feature anti-climb protection and galvanised steel. Easy to deploy and compatible with solar or fuel-cell power, they're ideal for remote or temporary use.

Events with large crowds
Mobile security towers enhance safety at public events through elevated CCTV monitoring for crowd control and threat detection. Strategically placed, they offer 6–9 metre visibility, real-time response, and support for lighting, speakers, and branding. Solar or fuel power enables independent operation, ideal for short-term, high-impact security deployments.

Securing solar farms
Mobile security towers safeguard remote solar farms from theft and vandalism with wide-area surveillance from elevated masts. Their rugged, vandal-resistant design and autonomous power options ensure reliable performance in harsh environments. Fast deployment and support for ANPR and thermal cameras enable effective monitoring, making them a scalable, long-term solar security solution.

Build it to your needs

Rapid deployment towers empower installers to use their preferred cameras, analytics, and devices—be it fixed, PTZ, thermal, or AI-enhanced systems. With full compatibility across brands, these units offer true integration freedom. Power options include mains with battery backup, solar panels, and methanol or hydrogen fuel cells, ensuring uninterrupted performance at any location.

CE and TÜV approval

TelescopicMast's surveillance towers are CE and TÜV certified, meeting stringent European standards for safety, durability, and structural integrity. These certifications ensure high wind resistance and reliable performance in demanding environments. Trusted by security professionals across critical sectors, the towers provide robust, high-performance surveillance built for long-term use in challenging conditions.

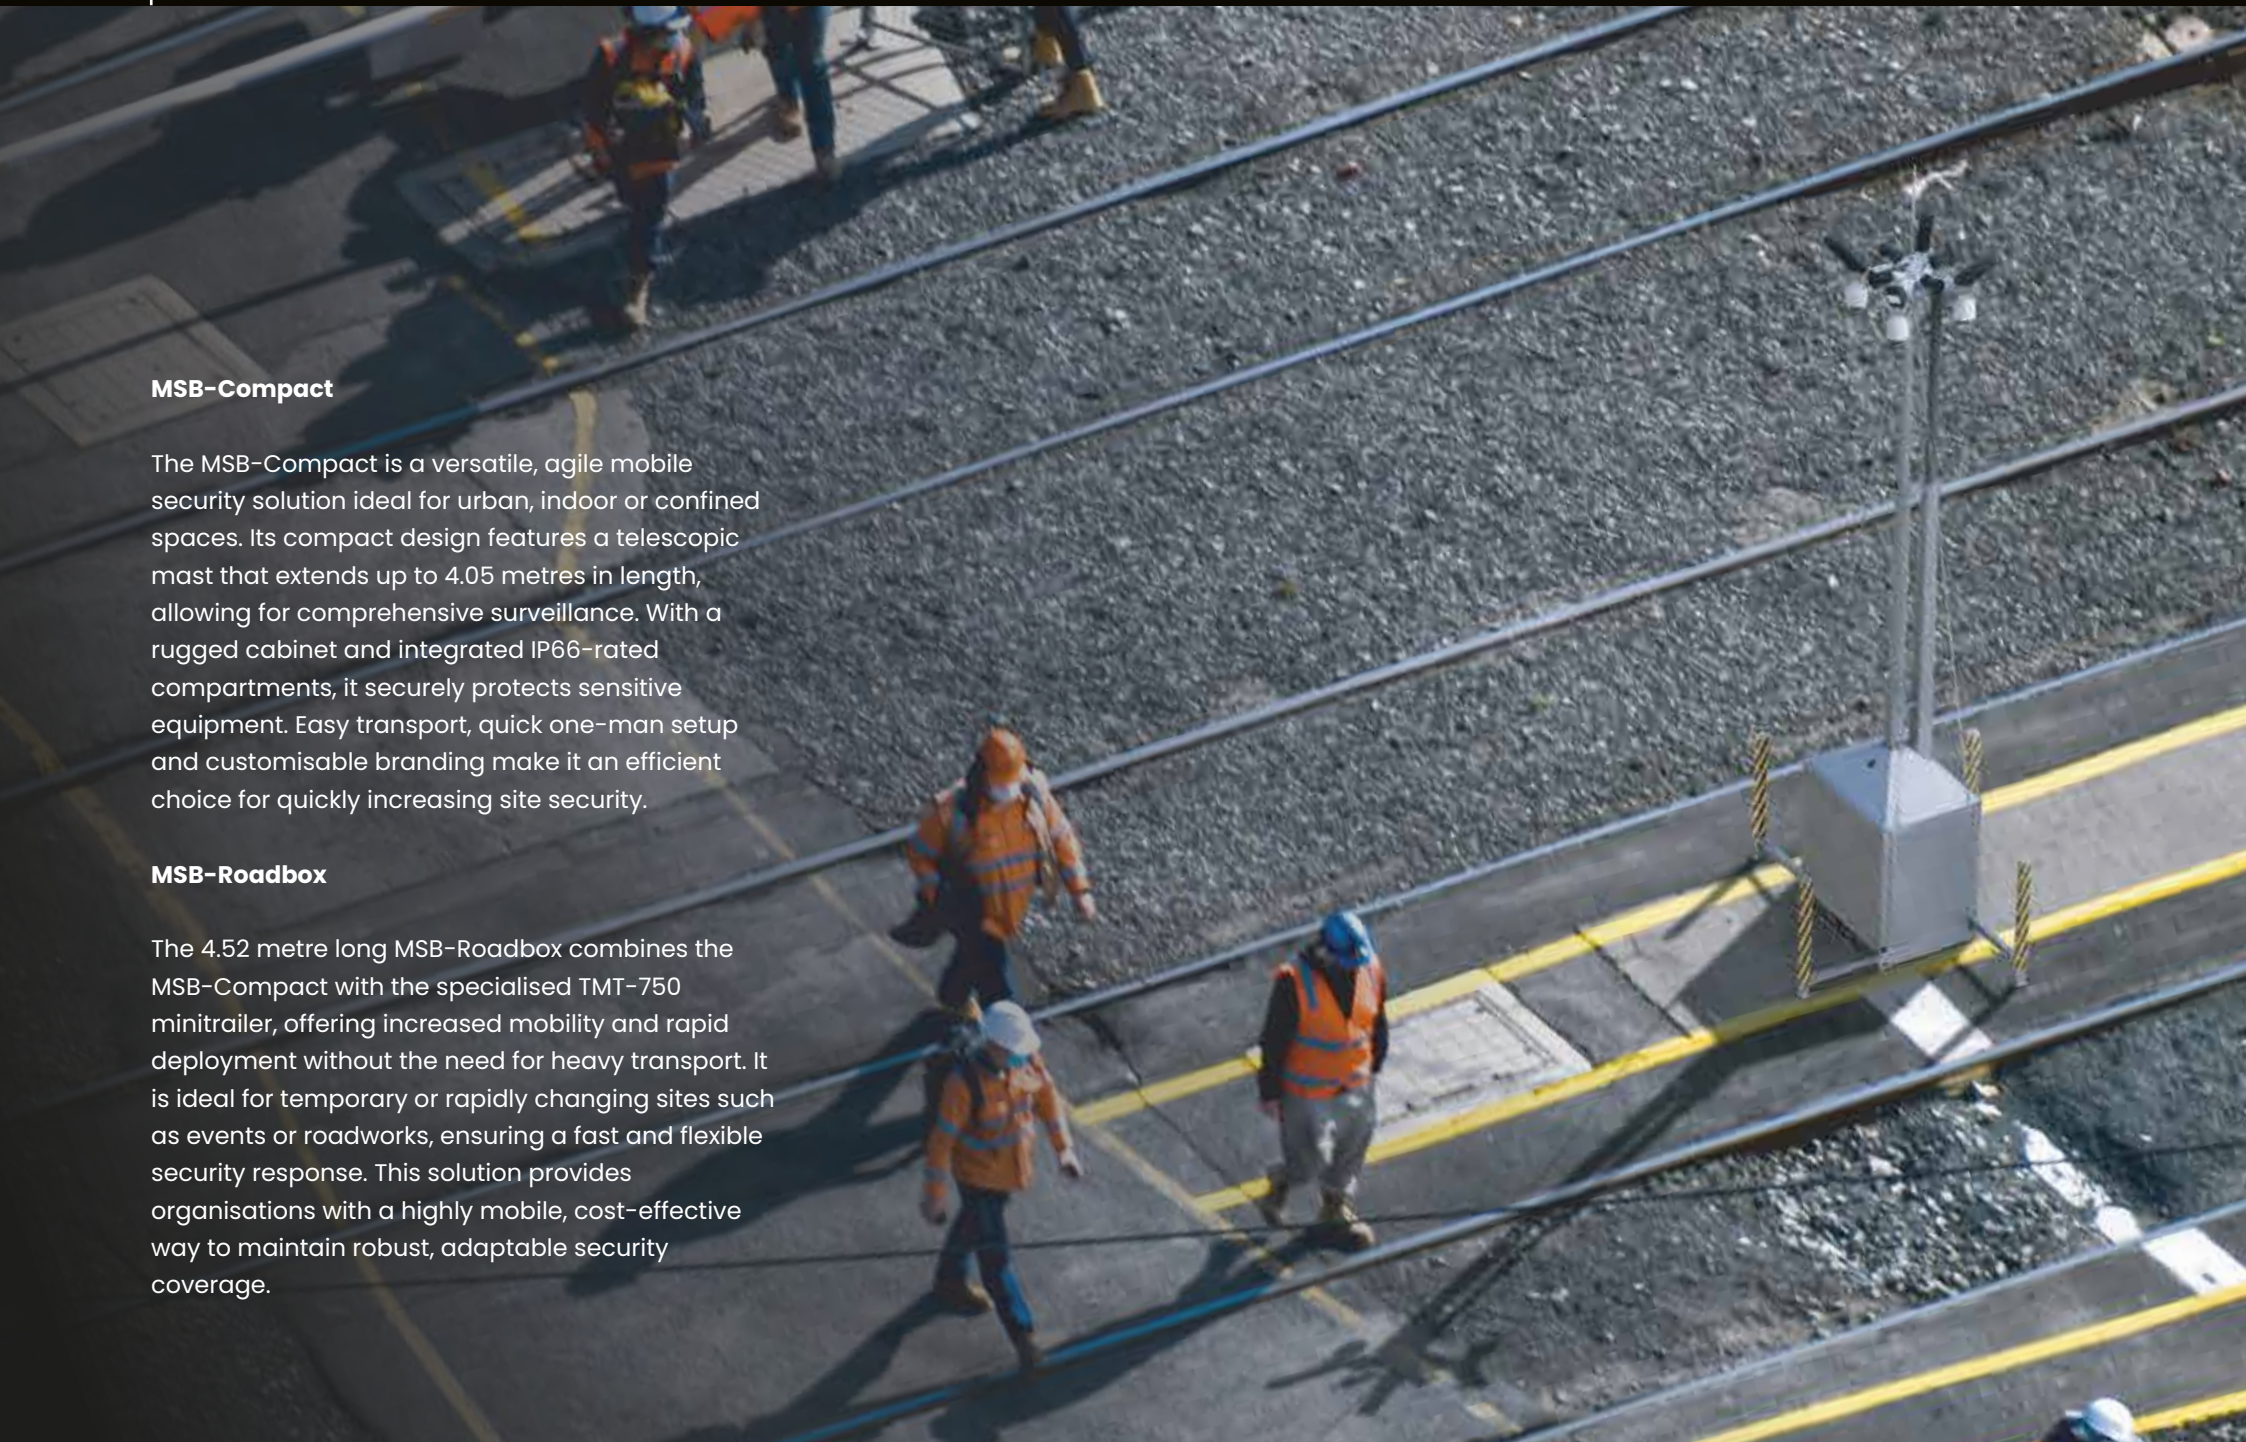
TELESCOPICMAST



MSB-Compact

The MSB-Compact is a versatile, agile mobile security solution ideal for urban, indoor or confined spaces. Its compact design features a telescopic mast that extends up to 4.05 metres in length, allowing for comprehensive surveillance. With a rugged cabinet and integrated IP66-rated compartments, it securely protects sensitive equipment. Easy transport, quick one-man setup and customisable branding make it an efficient choice for quickly increasing site security.

MSB-Roadbox

The 4.52 metre long MSB-Roadbox combines the MSB-Compact with the specialised TMT-750 minitrailer, offering increased mobility and rapid deployment without the need for heavy transport. It is ideal for temporary or rapidly changing sites such as events or roadworks, ensuring a fast and flexible security response. This solution provides organisations with a highly mobile, cost-effective way to maintain robust, adaptable security coverage.

Features and specifications

TELESCOPICMAST

Features MSB-Compact	Specifications	MSB-Compact	MSB-Roadbox
Mobile unit easy to transport to site	Transport size (LxWxH)	62x80x18 cm	240x139x228 cm
Easy to store			
Basic ground frame	Required extended floorspace (LxW)	117x134 cm	164x177cm
Easy to install by one engineer			
Forklift slots, for easy transportation	Weight	190 kg	365 kg
Lifting eyes, for easy transportation and deployment			
Stable Telescopic mast	Total height with extended mast	405 cm	452 cm
Automatic safety stop			
Multifunctional masttop bracket; design your own solution.	Adivised maximum weight in masttop	60 kg	60 kg
Four spoke masttop for CCTV cameras or floodlight			
Spirit level for easy installation	Maximum windload without stabilisers	79 Km/h	79 Km/h
Cylinder locks on all sides			
Prepared for additional security lock	Maximum windload with stabilisers	101 Km/h	101 Km/h
Fully lockable cabinet			
Vandal resistant cable conduit	Manual CE approved winch	550 kg	550kg
Roof climb protection			
Patchbox / IP66 box installed	Steel galvanised construction	yes	yes
4 stabilising cables, reducing vibration and false alarms			
Stabilised by 4 stabilisers	Steel galvanised mast	4-part	4-part
Sides suitable for branding with logos or messaging			
Double cabling in mast (safer for people and equipment)	Premium telescopic mast	80/60/40 mm	80/60/40 mm
Sufficient space for installing batteries or fuel cells			
Hoisting mast RVS316 stainless steel cables	Certifications	CE Certified	CE Certified
Hydraulically pressed cable clamp		ISO9001 Certified	ISO9001 Certified
Manual included		TÜV Certified	TÜV Certified
Warning labels			
Nylon wheels with bearings			
Features MSB-Roadbox			
Mobile trailer, unit easy to transport to site			
For transport or as a fixed mobile CCTV security solution
