About TelescopicMast

At TelescopicMast, we understand the pressure to keep sites safe – especially when things are happening fast and the stakes are high. That's why we've made it our mission to deliver seriously reliable, rapidly deployable CCTV towers that simply get the job done.

Since launching in 2018, we've become a trusted name for over 200 customers in more than 30 countries, worldwide. From construction sites and event venues to remote infrastructure, solar parks, data centres and military zones, our towers are out there every day – helping security teams like yours stay in control, whatever the environment.

We design and build everything ourselves. Our engineers obsess over the details, making sure every mast and trailer is tough, easy to deploy and ready to work with your preferred surveillance equipment. Nothing off the shelf – just smart, practical design that stands up in the field.

Behind the scenes, we've got a team of logistics and customer service professionals to keep things running smoothly. Orders ship fast, support is always a phone call away, and we listen when you tell us what you need.

Our flagship product – the Mobile Security Box – is designed to be flexible, future-proof and tough enough for the real world. And yes, it's been put through its paces and certified by TÜV Rheinland, so you know it's safe and sound.

After all, we're not just here to sell you a product. We're here to be a partner you can count on, whether you're rolling out five units or fifty.

Thank you for being part of the journey.

Load, lift and drive...

Transporting your Mobile Surveillance towers

Traditional surveillance trailers add unnecessary cost and complexity. TelescopicMast offers a smarter, more cost-effective solution by using trailers solely for transport, eliminating bulky components on site. This reduces clutter, lowers costs and allows investment in better equipment. Designed for one-man operation, these trailers ensure precise positioning on any terrain. With hydraulic lifting, shock absorbers and a galvanised chassis, they provide durable, efficient and reliable security in any environment.

TMT-750

The TMT-750 is a compact trailer designed for easy transport of Mobile Security Boxes. With a maximum permitted weight of 750kg, single braked axle and galvanised chassis, it's ideal for confined spaces. No hydraulic lifting, but easy to load with a forklift. Perfect for flexible, cost-effective deployments where speed, simplicity and one-man operation are required.

TMT-1300

The TMT-1300 trailer provides efficient transport of Mobile Security Boxes, handling loads up to 1300 kg on its 125 x 125 cm platform. With a manual hydraulic lift, single braked axle, adjustable forks, shock absorbers, wheel chocks and galvanised chassis, it allows a single operator to quickly unload and position security masts without the need for a flatbed truck.

TMT-2500

The TMT-2500 trailer can carry heavier loads up to 2500 kg on its larger 250 x 125 cm cargo area. Equipped with an electric-hydraulic lift, twin braked axles, adjustable forks, wheel chocks, shock absorbers and a durable galvanised chassis, it provides reliable transport and easy maneuverability by one person, even on uneven terrain.

Features TMT-750		Specifications	TMT-750	TMT-1300	TMT-2500
Heavy support wheel		Size:	140x255x90 cm	193,1x300x124 cm	191,8x425,7x118,3 cm
Shock absorbers					
Hot dip galvanised chassis		Maximum permissible weight:	750kg	1300kg	2500kg
		Own weight:	170kg	375kg	650kg
		Load capacity:	750kg	925kg	1800kg
Features TMT-1300		Loading space dimensions (LxW):	62x80cm	125x125cm	250x125cm
Heavy support wheel		Axle:	Single axle 750 kg	Single axle 1300 kg	Twin axle 2500 kg
Shock absorbers					
Wheel chocks		Braked axle(s)	Yes	Yes	Yes
Adjustable forks (width)					
Tie hooks and rails		Lifting Mechanism:	No	Hydraulic	Electric - hydraulic
Hot dip galvanised chassis					
		Certifications	CE Certified	CE Certified	CE Certified
			ISO9001 Certified	ISO9001 Certified	ISO9001 Certified
Features TMT-2500
