Introduction to Telescopic Mast

Telescopic Mast is a specialist manufacturer and supplier of steel mobile security boxes with built-in Telescopic Masts which are widely used in construction site security, transport, infrastructure, energy, utilities, perimeter protection and event security.

Our masts extend to heights of 6 metres and are ideal for temporary installations that require fast deployment and secure protection for your electronic equipment.

Masts can be personalised with your company branding and can be bought or rented with manual and electric winches in the UK and Europe through our network of dealers.

Meet the Mast family...

Premium & Electric Mobile Security Boxes with 6m masts

Our specially designed Premium Mobile Security Box with a built-in 6 metre Telescopic Mast is suitable for all purposes.

Key Features:

- Mobile unit easy to transport
- Extendable mast up to 6 metres
- Fully constructed using galvanised steel
- Vandalism proof
- 2 opposite doors and top covers to safely store equipment
- Completely lockable
- 4 steel cables to stabilize mast head
- 4 extendable foot stabilisers for a stable base
- Mast top prepared for cameras/floodlights

Comes in two versions:

- MSB-6 Premium mast with manual winch
- MSB-6 Electric mast with electric CE approved 500kg winch

MSB6-Premium

MSB6-Electric

Basic Mobile Security Box with 6m mast

Our specially designed Basic Mobile Security Box is extendable up to 6 metres and is suitable for all purposes.

Key Features:

- Mobile unit easy to transport
- Stable Telescopic Mast for camera or CCTV
- Lockable door to store equipment
- Fully constructed using galvanised steel
- 4 extendable stabilisers for a stable position

MSB6-Basic

TMSB1300 Mobile Security Box Trailer

Our specially designed mobile security box trailer is used to transport any of our masts quickly and easily to site. With the Mobile Security Box Trailer you can:

- Safely transport masts to site without the need for a flatbed truck
- Easily unload and position masts on site
- Transport masts over rough terrain
- Operate the trailer and install a mast with just one person
- Manoeuvre a mast into position in small areas and limited access sites
- Transport on UK & European roads as no special driving licence is required

Secure mobile security boxes with integrated telescopic masts

Flexible mast solutions for site security

Telescopic Masts can be used for temporary and semi-permanent applications to improve site security. They are easy to transport to site and are quick to unload and set up on site.

Key benefits of a Telescopic Mast:

- Easy to load/unload
- Secure security box protects equipment on site and during transit
- Fast installation
- Stable in all conditions

Telescopic Mast are specialists in designing robust, secure and stable masts that are easy to get to site and to unload and position. Our masts enable you to brand the mast with your own company logo to promote your company if you are an installer or to provide on-site information if you are an end user.

Our focus is on the design and build of a high quality, secure security box with a built in mast which means that you have the flexibility to choose your own cameras, lighting and transmission equipment. The advantage of this is you are not locked into an expensive fixed solution which means you save money, time and have the flexibility of which equipment you use.
